

Welcome to the Airalo Sample Project. All you need to do is follow the instructions very carefully and complete all tasks on time. Good luck and also don't forget to have fun. What we are expecting from you:

- A Mobile Application where all desired features work properly
- If you have any feedback about all processes, do not hesitate to contact us.
- While sending the final project make sure to include git history.

Feel free to check out the Airalo application on these links for a working version: [iOS Application](#) | [Android Application](#)

Requirements

- Git must be used and commit history must be shared.
- The app must be coded with the native Programming Language for iOS or Android.
- Code style must be consistent and any unused or auto-generated code must be removed.
- UI must be implemented programmatically. (e.g. SwiftUI can be used.)
- All screens should be pixel-perfect.
- There should be no errors or warnings.
- The app must compile, run, and be functional.

Optional requirements

- MVVM Architecture should be used.
- 3rd party libraries should be abstracted.
- Failure & loading states should be handled.

APIs

You can find the API documentation in the following [Postman link](#). Data provided via APIs shared under user stories.

Design

You can find the design handoff in the following [Figma Link](#). APIs provide all the dynamic contents such as County Flag, Region Image, Operator Logo, Operator Colors, etc.

Tasks

All tasks will be given as user stories and acceptance criteria.

User Story

As a [End] user, I want to buy a local eSIM to connect to the internet in the destination country.

Acceptance Criteria

- End-users must be able to see countries by default
- End-users must be able to tap into a country
- End-users must be able to open the list of available eSIMs in the country

Flows

- Tap a Country > See eSIMs in the country

APIs

- 1.1 Local eSIMs API
 - Provides
 - Country
 - ID (united-arab-emirates)
 - Name (United Arab Emirates)
 - Image
- 1.1.1 Country Packages
 - Provides
 - Package
 - Data (1 GB)
 - Validity (7 Days)
 - Price (8.5)
 - Operator
 - Name (Burj Mobile)
 - Country (United Arab Emirates)
 - Logo
 - Gradient Start Color (#F17F24)
 - Gradient End Color (#FFDE82)
 - Style (light)
 - Operator style affects content color
 - Light (white)
 - Dark (black)
